EDUCATION

Malaviya National Institute of Technology, Jaipur

Pack don of Tooknology

Jaipur, Rajasthan

Bachelor of Technology

Nov 2020 - May 2024

EXPERIENCE

Front - End Developer Intern

Jan 2024 – Mar 2024

Dotnitron Technologies

- Demonstrated proficiency in front-end development by utilizing, Next.js for achieving server-side rendering, resulting in a 23% performance improvement
- Built a secure login page using Shadow DOM components to integrate seamless user authentication with NextAuth reducing unauthorized access attempts by 50%
- Implemented responsive design techniques ensuring optimal display across devices, leading to a 30% increase in mobile user engagement.
- Collaborated closely with back-end developers and UX designers to enhance user interface and usability, resulting
 in a 15% boost in user satisfaction scores
- Optimized website components for maximum speed and scalability, reducing page load times by 35%.
- Tech Stack: Shaden, Next.js, React.js, JavaScript

PROJECTS

Predictive Maintenance using SMOTE Resampling and Random Forest

Jan 2024 – Apr 2024

- Developed high-accuracy predictive models, achieving 98% accuracy with XGBoost and Random Forest
- Executed advanced data preprocessing in **Python** by applying cleaning, imputation, standardization to ensure data quality
- Mitigated class imbalance using \mathbf{SMOTE} to enhance model performance by 20% on minority classes.
- Conducted rigorous model evaluation with accuracy, recall, F1 score, and confusion matrices.

Mega Blog App | GitHub

Dec 2023 – Mar 2024

- Developed a **feature-rich application using React.js** encompassing functionalities such as Signup, SignIn, Protected Pages, Visual Editor with 10+ text formatting options, and Image Upload
- Integrated Appwrite for robust back-end support, ensuring secure user authentication and seamless UX
- Employed Redux state management to maintain application state consistency

Hotel Management System | GitHub

Sep 2023 – Dec 2023

- Engineered a comprehensive hotel management system with functionalities for sorting hotels based on price and rating ranges and providing a list of hotels in a specific area or locality
- Integrated React-js, Node-js, MongoDB, and Express-js for a seamless user experience, resulting in a 40% decrease in system downtime.
- Implemented features providing curated hotel lists, resulting in increase in booking conversions and a 15% decrease in customer support inquiries.

SKILLS

Languages: C++/C, Python, JavaScript, HTML, CSS, SQL

Libraries/Frameworks: React, Node.js, Express.js, MongoDB, Numpy, Pandas, Scikit-learn

Developer Tools: Git, VS Code, Visual Studio

Course Works: Data Structures and Algorithms, DBMS, Operating System, OOPS, Machine Learning

ACHIEVEMENTS AND LEADERSHIP

- Ranked 570 out of 16,000+ participants in Codeforces Round Div 3 Link
- Solved 500+ problems on platforms like Leetcode, HackerRank, Codeforces, Codechef, GeeksforGeeks
- Ranks in the top 14% of Leetcode users Link
- 6 stars in Data Structures and Algorithms and 5 stars in C++ on Hackerrank Link
- General Executive Member of Data Science Club: **Led initiatives** to enhance data literacy, **organized workshops**, and **collaborated on projects** promoting data-driven decision-making
